WORK EXPERIENCE

Technical Consultant (Frontend Developer) Deloitte

06/2024 - Present

Jaipur, India

ITMS (Integrated Tax Management System)

- Developed a comprehensive tax management system for the Rajasthan government using Next.js, React, TypeScript, and React Query
- Independently established the entire frontend codebase, including theme configuration with Material-UI and Redux store implementation
- Designed and implemented a reusable component library, enhancing development efficiency and maintaining consistency across the application
- Worked on DevOps practices using Docker and Kubernetes, creating frontend application images and successfully deploying them to production servers
- Gained hands-on experience with containerization and orchestration technologies, contributing to the project's scalability and ease of deployment

Application Development Analyst Accenture

01/2021 - 06/2024

Achievements/Tasks

- Developed and maintained large-scale web applications using React.js for clients in healthcare and transportation sectors, improving user experience and system efficiency
- Implemented robust state management solutions using Redux and Redux-Saga, resulting in a 30% reduction in application crashes and improved overall stability
- Optimized frontend performance through advanced techniques such as lazy loading and code splitting, achieving a 40% reduction in loading times across projects
- Designed and developed reusable component libraries, decreasing development time for new features by 30% and enhancing team productivity

CERTIFICATIONS

- [Azure Fundamentals \(AZ-900\)](#)
